The Standard Barometer and Thermometer are read at 4 a.m., 10 a.m., 4 p.m., and 8 p.m., and the daily means are obtained by the application of hourly corrections, deduced from twenty years' observations. The nature of the barometer is twenty-one feet above the level of the sea, and the pressure of the mercury is two feet less

the second. The wind, rain and ground weather registered are for the current and day—from midnight to midnight.

The total quantity of rain collected since 1st January is 0.05 inch, the average due for the same period being 1.37 inches.
